

CISCO SPA 500 Series IP Phones

Easy-to-use Cisco phones for Windstream hosted small business communications solutions.

Windstream and Cisco: Perfect network partners.

One of Windstream's most popular offerings for small and medium businesses is our Hosted VoIP service. VoIP (Voice over Internet Protocol) delivers voice and Internet over a single IP (Internet Protocol) connection instead of two.

By allowing Windstream to host this service, your company would avoid the capital expense of purchasing your own equipment. And also enjoy the convenience just one number to call for support and only one invoice to pay a month.

As a host, Windstream partners with leading communications companies to provide state-of-the-art equipment such as the Cisco SPA 500 Series IP Phone.

Solution Benefits

A Windstream Hosted VoIP solution with CISCO IP phones delivers the following business-class communications benefits:

- Investment protection, with the ability to move from IP telephony to premises-based unified communications when you're ready
- A large portfolio of affordably-priced phones
- Automated attendant
- 4-digit dialing
- Impromptu conferencing
- Conference bridge
- Call transfer, hold, and park
- Do not disturb
- Voicemail
