

## **MegaPath Expands Business Ethernet Service - Including New **On-net** Options!** *Voice Enabled with QoS and Available at Head-end Locations in MPLS VPNs*

Powered by the largest QoS-driven MPLS network in the country, MegaPath On-Net Business Ethernet services are perfect for customers with growing bandwidth and application needs, but hindered by limited budgets. MegaPath Business Ethernet solutions offer higher bandwidth capabilities at price points below traditional Bonded T1 or SD3 prices with the flexibility of 4 "fit-any-business" solutions:

1. Stand-alone, off-net data-only service
2. Integrated on-net service
  - a. Analog, PRI, SIP Trunking, and Hosted services
3. On-net as part of an MPLS VPN solution - including having Business Ethernet at the head-end location
  - a. Add on voice and Managed Security Services for an all-in-one solution!
4. Off-net to an MPLS VPN solution via IPSEC

Business Ethernet is available in on-net and off-net in the following speeds (availability varies by location):

1. 2 Mb
2. 3 Mb
3. 5 Mb
4. 8 Mb
5. 10 Mb - Standard and Extended
6. 12 Mb
7. 15 Mb
8. 20 Mb
9. Plus, higher DSx options also available

All speeds and options are now available in the MegaPath pre-qual tool under the "Business Ethernet" header and product availability will automatically show per location. Don't forget, if the "Business Ethernet" circuit is Voice-enabled, the Duet flag will show.
